

Microsoft Excel Applying Design Style

Applying a Design Style

Once you have created the pivot table report, it is possible to add a design Style, this will enhance the presentation.

1. Select **PivotTable Tools** → **Options**.

2. Click on the **Select** button, this will give you various selection options.

Once you have selected the option required, the pivot table will highlight the area.

3. Click on the **Design** tab on the ribbon.

Select the required Design Style.
