

# Microsoft Word - GoTo

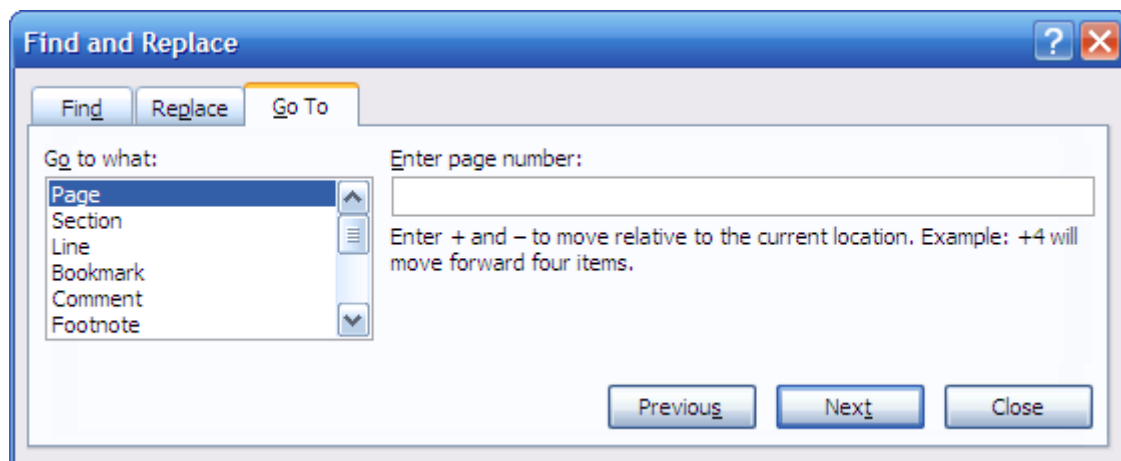

## GoTo

By using the drop down arrow at the end of the find button the Goto function can be activated.

The Goto allows you to specify which page or other object to go to.

Short cut keys to do the same are Function key 5 (F5) or Ctrl-G

If a certain number of pages forward or backward are required then a + or – followed by the number can be used in the dialog box.

It can also be done by using the Select Browse Object that is at the bottom of the vertical scroll bar.

Type of browse can be selected by clicking on the appropriate button.
